Report on Remedial Classes

The department of Electronics and Communication engineering arrange remedial classes for weak student so that performance can be improved to an appreciable level.

The department identify students based on their past performance and also on their response in regular class work. The time table for remedial classes is floated where these students are encouraged to attend special classes. The success of the initiative can be easily gauged by the success of students in final end semester examinations.

In academic year 2015-16 fifteen students participated in these classes

---

The remedial coaching provided by the faculty members provided a huge boost to the confidence of students. They were more secure about their academic performance in semester exams as compared to the time before provision of remedial coaching.

Thank You,

  
Head of Department
